Hi Jim

I apologize for pulling out so late. We are bracing for substantial flood response.

I will be forwarding details on fish collection later today.

Dan

Hi Dan,

I got your message the other day about your scheduling conflict. No problem. It is a little late in the game but I am sure I can fill a few spots to get a crew together next Wed-Fri. I have been swamped this week with field work and we are headed out again tomorrow morning and won't be back until Thursday afternoon. I hope to have a final itinerary and work plan out on Friday to everyone. It may be a moot point if the water levels don't drop. Please send me a protocol on how you want fish collected for metals testing.

Thanks,

Jim
